

Emily Anderson

2017-2018 Membership Director -
North

Sacramento State University

Graduation: December 2018

I am honored to have the opportunity to serve on the State Board of CNSA as Membership Director North. This organization is instrumental in the continuing development of the future of nursing and my experience as a member has been profound for me as a student. I have gained tremendous leadership skills and both personal and professional development through networking, service and community involvement. I look forward to inspiring nursing students to join in the opportunities and benefits of CNSA.

I am currently enrolled in the BSN program at California State University Sacramento. I have always had a draw to be of service to my fellow human and becoming a nurse has been a dream for many years. I look forward to the opportunity to impact patients' lives by administering an elevated level of care. I anticipate it to be utterly gratifying to provide the many facets of health care from preventative to providing comfort and dignity during difficult times. I want to offer healing to those that are ailing as well as educating people in ways to live healthier lives. Nursing is a career that will offer the kind of diversity that I desire and will present continuous challenges and endless possibilities to further learning. It is a privilege to be entering into such an honorable and rewarding profession.

Goals for 2017-2018

- Reach out to the schools in the northern region to assist in strengthening existing chapters as well as promote the creation and development of chapters where there are none.
- Raise awareness about the benefits of being an active member
 - Leadership Skills
 - Networking
 - Mentoring
 - Volunteerism
 - Personal & Professional Development
 - Scholarship Opportunities
 - Community Involvement
- Plan and organize an inspirational Membership North Meeting with considerations of creating beneficial sessions that provide valuable information and positive resources for students as they transition into the profession of nursing.

- Promote unity among chapters through utilizing social media. Strengthen and develop an online community through which chapters can network. This interface will foster communication and growth through collaboration and support.
